

Big Ideas Math®

Review for You

► Materials:

- 1 chapter test from the pupil's edition for each group
- Chalk or a dry erase marker for each group

► Directions:

Divide the class into four teams. Team members gather in groups at the board. One member of each team works the first problem from the chapter test. Coaching is allowed from the other team members. Check each student's work and award 2 points to the team if the work is correct. If the work needs to be corrected, award 1 point to the team after the student makes the corrections. Team members take turns working the problems. The process can be repeated until the test is finished, or until time runs out.

► Who Wins?

The team with the most points wins.

► Variations:

- Have students write review problems on 3x5 cards. The teacher can draw a card for the students to use.
- Use the same process to have students go over selected homework problems.
